SEATTLE MATH CIRCLE

FEBRUARY 27TH, 7-8:15 PM
@THE LAKESIDE SCHOOL

How many colors do you need to color a map effectively? How can a teacher assign groups to avoid cliques? We will take a look at these questions and similar "coloring" problems. Along the way, we will explore and learn some graph theory.

Snacks and coffee will be provided. Limited parking available in the lot behind the school.

Questions about the event can be directed to Hudson.Harper@downtownschoolseattle.org
